EDUCATION

Yale University, New Haven, CT — Expected May 2030
B.S. in Mathematics and Computer Science

Relevant Coursework: Introduction to Programming (In Progress), Calculus II (In Progress), AI as a Global Cultural Artifact (In Progress), Introduction to Computer Science (Planned, Spring 2027), Calculus III (Planned, Spring 2027)

Chalmette High School, Chalmette, LA — Graduated May 2026
Awards:
Silver Presidential Volunteer Service Award (2024); Certificate of Appreciation, Consulate of the Republic of the Philippines in New Orleans (2024, 2025), for outstanding assistance at Fiesta Filipina.

EXPERIENCE

Awarely AI (awarely-ai.vercel.app), Founder and Developer

- Built and deployed a full-stack wellness and journaling platform featuring AI companionship, private reflection, and visual memory tracking.
- Developed frontend and routing with Next.js; deployed through Vercel and GitHub.
- Implemented user authentication and private data storage using Supabase.
- Integrated Google Gemini and Groq APIs to power conversational AI companions.
- Built a timeline for saving and revisiting photos and journal entries.
- Used AI-assisted development tools to implement features, debug code, and troubleshoot issues.

China Moon Restaurant, Team Member (Part-Time) | Chalmette, LA | 2020 – Present

- Support daily operations of a family-owned restaurant, working after school through middle and high school and during breaks while attending Yale.
- Handle kitchen prep, order packaging, customer service, process cash payments, and translate between staff and customers to communicate orders and resolve questions

ACTIVITIES

Amoriem Lab (Game Development Club) | Programming Team Member | Yale University | September 2030 – Present

- Develop *Degrading Dream* game features using Unity and C#; collaborate through Git/GitHub branching, commits, and merges.

Yale Undergraduate Quantum Computing (YUQC) | Quantum Cryptography Team Member | Yale University | September, 2030 – Present

- Studying the mathematical foundations of quantum computing, including linear algebra, as preparation for quantum cryptography projects.

Yale Computer Society (y/cs) Catalyst Program | Yale University | September 2030 – Present

- Selected for a semester-long mentorship program; build and deploy software projects approximately every two weeks.

SKILLS

- Computer Skills: Java, python, C#
- Language Skills: Mandarin Chinese (intermediate)
